TECHNOLOGIES

PRODUCTS

Best in Class
Durable, Dependable

SEPARATED COMPONENTS	TYPICAL INLET	STREAM	ePROCESS PRODUCT	TYPICAL OUTLET	LOCATION
SOLIDS	1-3% vol	multiphase fluids	Wellhead Desander	> 5 micron	wellhead, subsea
	1-3% vol	multiphase fluids	Solids Filter	50-200 micron	wellhead
	500 ppm	water	Desander	> 10 micron	topsides
OIL	2,000 ppm	water	Deoiler	< 40 ppm	topside, subsea, downhole
	200 ppm	water	DGF / IGF	< 15 ppm	topsides
	2,000ppm	water	Sump Caisson	< 50 ppm	cellar deck
GAS	to 80% GVF	multiphase fluids	Compact Degasser	< 1% GVF	topside, subsea, downhole
WATER	10-30% vol	oil	Dehydrator	< 5% vol	topside, subsea, downhole
	70-90% vol	oil	Dewaterer	10-20% vol	topside, subsea, downhole

PROCESS

Solutions; Topsides, Wellhead, Subsea, Downhole
Fabrication; Downstream Choke - ASME; Upstream Choke - API

FACILITIES SAND MANAGEMENT

- Wellhead Desander
- Solids Filters
- eJECT™ Solids Jetting
- Solids Washing Systems
- Collection / Transport / Storage

PRODUCED WATER TREATMENT

- Desander Systems
- Deoiler Systems
- DGF / IGF Systems
- Sump Caissons

COMPACT SEPARATION SYSTEMS

- Oil Production**
 - Partial Processing
 - Preseparation / Dehydration
 - Extended Well Test Packages
 - Compact Production Systems

Gas Production

- Wellhead Gas Desander
- Compact Degassing Systems

PEOPLE

Talented, Capable, Experienced
Developing, Improving

- Over 25 years Proven Track Record of Advancing Separation Solutions
- Products with Immediate Positive Impact - Increasing Production - Reducing Costs
- Technology the Core of our Business / Products under Continual Development
- Our Success Built on Ongoing Customer Partners, Alliances & JIP's
